Gestura Display

7 weights · 14 styles

Gestura's unique personality is amplified by its Display family, with its most distinctive characteristics enhanced for greater expressive quality. Higher contrast, subtle ink traps, longer ascenders and descenders, and elegant hairline punctuation add up to create a unique typographic voice.

Optimised for use at and above 72pt, Gestura Display is perfectly suited for short, impactful statements.

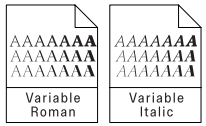
Gestura Full Collection



Variable Fonts

Variable fonts allow the user to create custom weights and optical sizes from a single file. Due to ongoing and rapid changes to desktop publishing software, we are currently unable to offer variable fonts for sale, however we are offering free beta versions to users who purchase certain full subfamily packages.

Users purchasing a full single optical subfamily of Gestura, will receive free beta versions of our variable fonts for Gestura's Roman and Italic styles, allowing variable adjustment of weight. Users purchasing all three optical subfamilies will receive free beta versions that allow variable adjustment of both weight and optical size.

At the time of this release, variable fonts are currently best supported by Adobe Illustrator. Sociotype is not responsible for functionality of variable fonts within third-party software.

Custom Versions

A custom typeface is one of the most powerful ways for a brand to distinguish its voice from competitors. Even the most subtle variations in style and form can significantly affect how we perceive messages and tone of voice, so custom type is always an investment worth considering.

Unlike most foundries, we offer an integrated approach to typographic and brand identity, in partnership with our sister creative studio, SOCIO. Get in touch to find out more.
